Audit reference 2026-10-13T18:29:09.026Z; collected through 2026-10-13T18:29:09.194Z

Exact client/window {"subject":{"kind":"client","entityType":"client","entityIds":["99999999-9999-4999-8999-999999999999"],"tenantId":"72000000-0000-4000-8000-000000000020","actorId":"72000000-0000-4000-8000-000000000021","authorizationDecisionId":"66666666-6666-4666-8666-666666666666","policyRevision":"aaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaa","scopes":[{"tenantId":"72000000-0000-4000-8000-000000000020","kind":"client","resourceId":"99999999-9999-4999-8999-999999999999","policyRevision":"aaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaa"},{"tenantId":"72000000-0000-4000-8000-000000000020","kind":"mailbox","resourceId":"71000000-0000-4000-8000-000000000071","policyRevision":"aaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaa"}],"rosterVersionId":null},"window":{"basis":"unbounded"}}

Commitment ledger

Promise, suggestion, owner, due date, tracking link and delivery meanings are extracted unverified observations. A native completed flag, URL or quoted passage alone never establishes delivery or acceptance.

No bound promise observation was compiled in the checked portion. This does not establish that no commitments exist.

Suggestions and unresolved observations

[unbound observation, requires review] promise | Missing exact full version/hash-bound source passage. | I will send the revised briefing on Friday. This is a quoted source statement, not verified delivery.

[unbound observation, requires review] same-original-conflicting-owner | Missing exact full version/hash-bound source passage. | I will send the revised briefing on Friday. This is a quoted source statement, not verified delivery.

[unbound observation, requires review] claimed-delivery | Missing exact full version/hash-bound source passage. | I will send the revised briefing on Friday. This is a quoted source statement, not verified delivery.

Native tracking appendix

These are authorized structured source rows, separate from extracted promise observations. Native status, owner and date remain source assertions. Native completion never verifies delivery or acceptance. No promise link is inferred from title, URL, owner, date or recommendation text.

No native tracker row was returned in the admitted checked portion; missing reads and bounded pages never establish that no tracking exists.

Coverage and verification appendix

Every original required source is shown. All source authenticity, current policy, snapshot, enumeration and semantic completion remain unqualified unless separately accepted. Missing or unrequested material is not empty; no negative claim is supported.

mail | not-read | freshness unknown | enumeration unknown | complete false

Coverage details {"sourceId":"mail","authority":"authoritative","status":"not-read","freshness":"unknown","asOf":null,"retrievedAt":null,"snapshotVersionId":null,"enumeration":"unknown","returnedCount":0,"limitations":["Required source has no admitted decisive read."],"continuation":{"cursor":null,"requiredReads":[],"remainingSources":["mail"]},"complete":false,"operations":[],"sourceWindows":[],"selectedWindow":{"basis":"unbounded"},"windowMatch":"not-read"}

meetings | not-read | freshness unknown | enumeration unknown | complete false

Coverage details {"sourceId":"meetings","authority":"authoritative","status":"not-read","freshness":"unknown","asOf":null,"retrievedAt":null,"snapshotVersionId":null,"enumeration":"unknown","returnedCount":0,"limitations":["Required source has no admitted decisive read."],"continuation":{"cursor":null,"requiredReads":[],"remainingSources":["meetings"]},"complete":false,"operations":[],"sourceWindows":[],"selectedWindow":{"basis":"unbounded"},"windowMatch":"not-read"}

client_documents | not-read | freshness unknown | enumeration unknown | complete false

Coverage details {"sourceId":"client_documents","authority":"authoritative","status":"not-read","freshness":"unknown","asOf":null,"retrievedAt":null,"snapshotVersionId":null,"enumeration":"unknown","returnedCount":0,"limitations":["Required source has no admitted decisive read."],"continuation":{"cursor":null,"requiredReads":[],"remainingSources":["client_documents"]},"complete":false,"operations":[],"sourceWindows":[],"selectedWindow":{"basis":"unbounded"},"windowMatch":"not-read"}

tasks | partial | freshness unknown | enumeration unknown | complete false

Coverage details {"sourceId":"tasks","authority":"authoritative","status":"partial","freshness":"unknown","as

Of":null,"retrievedAt":"2026-10-13T18:29:09.170Z","snapshotVersionId":null,"enumeration":"unknown","returnedCount":0,"complete":false,"limitations":["Native coverage, content hashes and versions are unauthenticated producer assertions; no qualified freshness, history, snapshot or exhaustive absence.","Source authority describes the declared original owner; this receipt does not verify producer identity or authentic current authorization.","Opaque native cursor is forwarded without decoding, authentication or snapshot-safe continuation.","Native read coverage and metadata do not verify semantic conclusions or exhaustive history.","Projection-only or unsupported material: no complete eligible version/hash/body with an observed read time; metadata is not a decisive source excerpt."],"continuation":{"cursor":null,"requiredReads":[],"remainingSources":[]},"operations":[{"id":"query_tasks","version":"0.2.0"}],"sourceWindows":[{"basis":"unbounded"}],"selectedWindow":{"basis":"unbounded"},"windowMatch":"exact"}

action_recommendation | not-read | freshness unknown | enumeration unknown | complete false

Coverage details
{"sourceId":"action_recommendation","authority":"authoritative","status":"not-read","freshness":"unknown","asOf":null,"retrievedAt":null,"snapshotVersionId":null,"enumeration":"unknown","returnedCount":0,"limitations":["Required source has no admitted decisive read."],"continuation":{"cursor":null,"requiredReads":[],"remainingSources":["action_recommendation"]},"complete":false,"operations":[],"sourceWindows":[],"selectedWindow":{"basis":"unbounded"},"windowMatch":"not-read"}

client_knowledge_monday | not-mapped | freshness unknown | enumeration unknown | complete false

Coverage details
{"sourceId":"client_knowledge_monday","authority":"derived","status":"not-mapped","freshness":"unknown","asOf":null,"retrievedAt":null,"snapshotVersionId":null,"enumeration":"unknown","returnedCount":0,"limitations":["Required source has no admitted decisive read."],"continuation":{"cursor":null,"requiredReads":[],"remainingSources":["client_knowledge_monday"]},"complete":false,"operations":[],"sourceWindows":[],"selectedWindow":{"basis":"unbounded"},"windowMatch":"not-read"}

Missing source/read mail.search_messages: UNAVAILABLE

Missing source/read meeting.read_client_meetings: UNAVAILABLE

Missing source/read meeting.query_debriefs: UNAVAILABLE

Missing source/read read_client_documents: UNAVAILABLE

Missing source/read query_action_items: UNAVAILABLE

Missing source/read read_monday_client_boards: NOT_MAPPED

Limitation: Exact excerpts are bound to supplied gateway records; semantic promise, owner, date and tracking links require verification.

Limitation: No qualified delivery/acceptance adapter was supplied. This projection never upgrades native task completion to delivered work.

Limitation: Current authorization and authenticity are gateway/control duties; hashes alone do not establish either.

Original skill and immutable revision provenance
