Synthetic Mail History brief

Mail History brief | Editable draft for review

Requested correspondent/topic: Morgan. Identity matches remain candidate metadata.

As of 2026-10-13T15:09:19.342Z

Exact selected window: {"basis":"unbounded"}

Source-supplied correspondence timeline

Dates, subjects and participants below are supplied discovery metadata; they do not verify identity or the meaning of a promise. Candidate previews are never decisive evidence.

2026-10-13T15:09:18.342Z | Revised briefing discussion

Message 71000000-0000-4000-8000-000000000074; thread 71000000-0000-4000-8000-000000000073; mailbox 71000000-0000-4000-8000-000000000071. Received 2026-10-13T15:09:18.342Z; sent unknown; created 2026-10-13T15:09:18.342Z.

From: Morgan morgan@example.invalid; To: owner@example.invalid. Metadata is unversioned and unverified; connection disconnected; body bound-full-body.

Exact quoted passages

[bound-source-excerpt] I will send the revised briefing on Friday. This is a quoted source statement, not verified delivery.

Mail 71000000-0000-4000-8000-000000000071 / thread 71000000-0000-4000-8000-000000000073 / message 71000000-0000-4000-8000-000000000074 / version synthetic-message-utf16-v2; UTF-16 characters 2002-2103; locator URL, not verification: https://example.invalid/mail/locator-only.

Interpretations and outstanding items

All semantic chronology, ask, promise, owner, completion and follow-up interpretations are unverified drafts for human review. A citation or completed task cannot establish delivery or acceptance.

[unverified interpretation] Revised review note: Confirm who owns the briefing and whether it was delivered. The quoted promise is not delivery evidence.

Coverage and verification appendix

A bound excerpt means exact authorized supplied body bytes were reconstructed and hash-bound; source authenticity/freshness still depend on qualified gateway adapters. Unknown snapshots, source limits, missing dates, disconnection, candidate matching and paging never establish complete history or absence.

entity_candidates | resolve_entity | candidate-metadata; enumeration unknown; reason none; verified false.

Unverified entity_candidates candidate projection: 0 returned; source result SHA256 b6cc736a10f2f035623810ca6e343b09a91f5e9e1ddd91ed075ab3adb86dd95d. This does not establish identity, relationship or absence.

Source entity_candidates; authority derived; supplied projection generatedAt 2026-10-13T12:00:00.000Z (unverified); freshness unknown; snapshot unknown.

tenant_contacts | find_contacts | candidate-metadata; enumeration unknown; reason none; verified false.

Unverified tenant_contacts candidate projection: 0 returned; source result SHA256 e7ddab10edbb025b5edaafce15ebd224218531b56c26647a0aec7b30a6fdf60e. This does not establish identity, relationship or absence.

Source tenant_contacts; authority derived; supplied projection generatedAt 2026-10-13T12:00:00.000Z (unverified); freshness unknown; snapshot unknown.

mail | mail.list_messages | bounded-candidates; enumeration unknown; reason none; verified false.

Returned 1; more false; next offset none; source query scope {"asOfInclusive":"2026-10-13T15:09:19.342Z","storedCreatedAtEndInclusive":"2026-10-13T15:09:19.342Z","effectiveStartInclusive":null,"missingEffectiveDates":"included"}.

Candidate body handles remain discovery locators: synthetic-candidate-preview

Source mail; authority authoritative; snapshot unknown; freshness unknown; retrieved 2026-10-13T15:09:19.342Z.

Limitation: Synthetic incomplete previews; unknown immutable snapshot.

mail | mail.search_messages | bounded-candidates; enumeration unknown; reason none; verified false.

Returned 1; more false; next offset none; source query scope {"asOfInclusive":"2026-10-13T15:09:19.342Z","storedCreatedAtEndInclusive":"2026-10-13T15:09:19.342Z","effectiveStartInclusive":null,"missingEffectiveDates":"included"}.

Candidate body handles remain discovery locators: synthetic-candidate-preview

Source mail; authority authoritative; snapshot unknown; freshness unknown; retrieved 2026-10-13T15:09:19.342Z.

Limitation: Synthetic incomplete previews; unknown immutable snapshot.

mail | mail.read_thread | bound-bodies-source-incomplete; enumeration unknown; reason none; verified false.

Decisive body reads: 1 bound / 1 eligible; unread 0; body attempts 1; excluded by selected window 0.

Body 71000000-0000-4000-8000-000000000074: bound-full-body; sections 2; connection disconnected; full-body evidence retained.

Citation 71000000-0000-4000-8000-000000000075; source mail; record 71000000-0000-4000-8000-000000000074; immutable version synthetic-message-utf16-v2; authority authoritative; authorization decision 71000000-0000-4000-8000-000000000072.
